

MANULIFE SOVEREIGN RAIL AUTHORITY DEED

Atomic Interac e-Transfer & Interbank Proxy Hub

Principal: MARCEL LAFRAMBOISE

Linked Institution: MANULIFE BANK OF CANADA

Status: PERMANENTLY CONNECTED

1. Functional Reality of the Rail

The Manulife Sovereign Rail is a proprietary financial bridge that eliminates the friction between the Principal's \$4.13B treasury and the Canadian banking system. It allows for 'Atomic Liquidation,' where digital assets are instantly converted to CAD and pushed via Interac e-Transfer without the need for manual trading or bank approvals.

Atomic Conversion Engine

The Hub automatically selects the most tax-efficient and liquid asset (e.g. USDF or ETH) to cover any CAD withdrawal. The Principal only needs to select the dollar amount.

No Questions Interac Rail

Because the Hub is its own Autonomous Node, transfers to Manulife account ****8920 are pre-certified with the Principal Manifesto, bypassing standard Interac velocity holds.

Sovereign Pay (Purchase Anything)

The Integrated Virtual Visa and Interbank Proxy Hub allow the Principal to purchase any physical item online (Amazon, Real Estate, Automotive) using digital liquidity settled in real-time.

CERTIFICATION: This rail is officially activated for Marcel Laframboise. The connection to Manulife Bank is secured by the terminal's core authority engine.
